

CRANFORD PAL FOOTBALL DAILY PRE-SCREENING PROCEDURES

1. Each grade level to have assigned one screener per practice/game session. Screener can be a volunteer parent, coach or other responsible individual.
2. Parent/Guardian is to remain onsite until their participant has been cleared through the screening process.
3. Screener must answer the daily questionnaire and have their temperature taken before they will be allowed to screen the rest of the group.
4. All participants, players and coaches, MUST answer all questions on the Google Docs Questionnaire named "2020 Cranford PAL COVID-19 Practice Questionnaire" electronically before entering designated area. Parents/Guardians can answer the questionnaire for the player.
5. Responses to the Questionnaire:
 - Question #1 – If any of the listed symptoms are checked off, the participant is not allowed to participate that day. They will be allowed to participate if none of the symptoms are checked off. If the symptoms persist, please see a doctor.
 - Question #2 and #3 - If anyone answers 'Yes' to either questions, they will NOT be allowed to practice. Please do not allow your participant to enter the practice field/designated area if any of their answers are 'Yes'. We are requiring that if the participant answers 'Yes' to either question, that they quarantine for a period of 14 days from the last date of exposure. If all answers to the questions are 'No', the player may enter the designated area for further screening.
6. There will be an assigned designated area for each grade level to enter each field. The area should be placed in a shaded area to help limit false temperature readings.
7. Screener and player/coach being screened are required to wear a facial covering for the duration of the screening process.
8. Proper distancing of 6' must be maintained while participant is waiting in the designated area.
9. The Screener is required:
 - Ask participant if they have taken the electronic questionnaire. If they answer 'Yes', screener can proceed to take their temperature. If the answer is 'No', the participant must leave the line and return after submitting the questionnaire.
 - Once the participant answers 'Yes' that they have taken the electronic questionnaire, the screener can proceed with the temperature check. All participants must have a temperature below 100.4 degrees. If their temperature is 100.4 degrees or higher, they will be asked to leave the field. Protocols regarding return to the practice after a 'Yes' on the questionnaire or a higher than 100.4 degrees temperature are based on current NJSIAA guidelines.

10. Once the participant has passed the Questionnaire and Temperature screening, they may enter the field of play.
 - Players may remove the facial covering during practice / game but if they do, must continue proper safe distancing of 6' while the facial covering is not worn.
 - Coaches must always have their facial covering on their person. Coaches must wear the facial coverings if they are within 6' of any player. They may pull down their facial covering if they are able to maintain at least 6' distance.

11. If any participant has been out of state in a high-risk state or have been around a COVID-19 positive patient, you must quarantine from the program for 14 days. If you test positive for COVID-19 you must be symptom free for at least 3 days and cleared by a doctor prior to returning.
