

## Penn Township COVID Quarantine Decision Matrix

### General Quarantine Decision Matrix

This matrix provides guidelines for deciding what player action is needed based on symptoms and personal risk level of that player. Common symptoms of COVID-19 include fever, cough and/or difficulty breathing. Actions are described for players that can be considered high, medium, or low risk, based on if they are showing symptoms, their travel history and contact with an infected person. This guidance acknowledges direct contact and indirect contact. Indirect contact is when a player has been in contact with someone (ex. a parent, sibling, friends, etc..) who has been in contact with a person with a confirmed case.

Symptoms or No Symptoms	Questions?	If yes, Player Risk Level	Player Actions
Player currently shows symptoms of COVID-19	Did player travel in the last 14 days?	<b>High</b>	Self-quarantine for 10 days, email PTAA President <a href="mailto:ptaa.president@playptaa.com">ptaa.president@playptaa.com</a> , and contact medical provider. Follow instructions provided by medical professional, do not travel. Return to play no sooner than 48 hours after symptoms have subsided.
	Did player have direct contact with a person that has a laboratory confirmed case of COVID-19?		
	Did player have indirect contact with a person with a laboratory confirmed case of COVID-19?		
Player does not show symptoms of COVID-19	Did player travel in the last 14 days?	<b>Medium</b>	Self-quarantine for 10 days, monitor symptoms, avoid PTAA activities.
	Did player have direct contact with a person that has a laboratory confirmed case of COVID-19?	<b>Medium</b>	
	Did player have indirect contact with a person with a laboratory confirmed case of COVID-19?	<b>Low</b>	Self-Observation, monitor symptoms
	Did player have no travel or contact with confirmed case of COVID-19?	<b>No Identifiable Risk</b>	None

**If a player has a confirmed case of COVID-19, please seek further guidance on the playtaa.com website under the COVID-19 section**
