

Remove the Medical Release Question

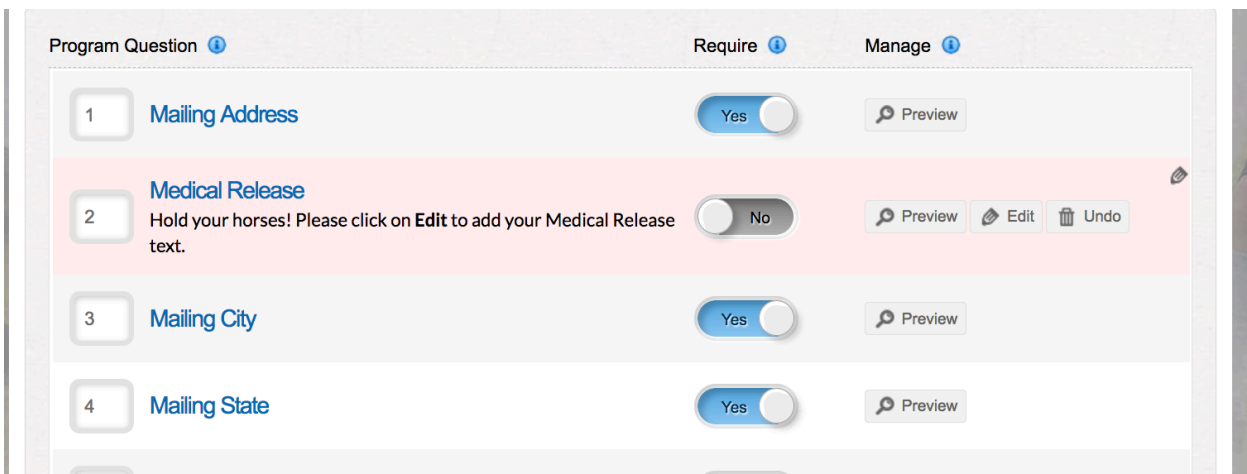

Some regions templates from Blue Sombrero included the program question “Medical Release” which would force you to edit it and add the medical release text. This is an error and must be removed (AYSO’s legal text in in the second to last question in the template already and no alteration should be done).

So if you see this question in your program, click the remove button.

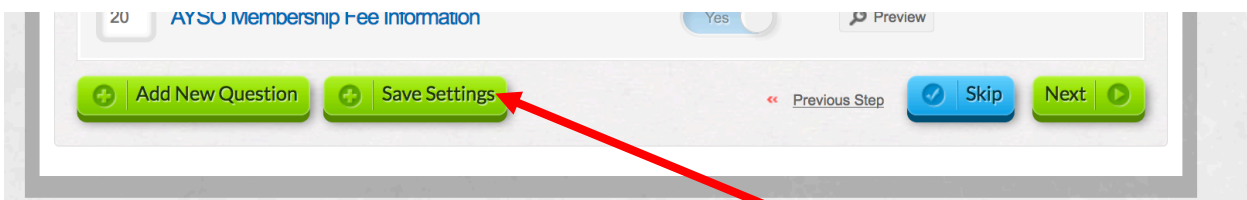

1

After clicking the remove button, the field turns pink

Now click the Save Settings and that will actually remove the question
