0 Partial Responses

Q1

The board of directors is considering making the following changes for next years (2020) TEE BALL Program. Please provide your feedback on each potential change.

1) Move to one practice and one game per week. The goal in doing this is giving coaches more time to focus on developing player skills such as proper throwing technique, catching/receiving and batting. Practices would include intra-team game play.

1. Practices can be MORE fun at this level than the games and they really learn more in that time.
2. Coaches should hold a 30 min practice before games.
3. Having multiple games and practices made our boys stronger as a player.

4. I can't always make it to mid-week games which is disappointing for my son. Learning the fundamentals is key at this level so keep practices.
 5. I'm not sure about this. I think more practice is a good idea...but maybe just have more practices and less games overall.
 6. Its fine how it is, but I would support this too.

Q2

2) Practice on set day. Games on Saturday.: Goal is to provide parents with a more predictable schedule.

1. Doesn't matter. We get the schedule ahead of time... so it's not a big deal.
 2. Strongly oppose. Like a mix to maximize family time on the weekends occasionally and we can also have fun weeknights out at the game. Its the best of both worlds as is.
 3. This would be great- when practices/games change it is really hard to plan.

Q3

The following changes are being considered for the 2020 ROOKIE BALL PROGRAM. As your player will be eligible for this program next season, we would like your feedback on the proposed changes.

1) Similar to TEE BALL, move to a schedule with 1 practice and 1 game per week, allowing for greater focus on developing player fundamentals for this age group (throwing, catching, hitting). Practices include intra-team scrimmages that allow for more player involvement.

1. 1 hour to 30 min practice before game
 2. Its fine how it is, but I would support this too.
-

Q4

2) Move to machine pitch instead of coach pitch. The goal is to give hitters a more consistent pitch to hit (coaches often have trouble throwing into the smaller strike zone).

1. I think the earlier the kids learn to hit real pitches the better. But I understand this would speed things up and give more kids confidence with hitting. I'm somewhat divided but lean towards sticking with coach pitching.
2. I have a kid in A ball and it works better than coach pitch by far
3. Use the machine for practice as well
4. Start the season with coach pitch & using the T. Then introduce the pitching machine in mid-season.
- 5.

6. The machine might be a bit intimidating at first, plus being pitched to you (even if they aren't perfect - which is okay/good for the kids to see that coaches aren't perfect too) is a core part of the game.
 7. I'm not sure they would be ready for this?! Single A just started this and some still can't hit it reliably, even at the end of the season.
 8. Kids hit better of a human than a machine and given the trouble some had at single A on a machine, i don't think it would work at rookie.
 9. How about 1/2 & 1/2? Like the kids to get pitching experience too but perhaps that will be made up for in practice?
