

## **PICTURE DAY SAFETY PROCEDURES FALL 2020**

Olson Photography is adopting the following procedures this fall to make picture day as safe and enjoyable as possible. Please review them at your convenience.

The players will be instructed to line up at the photographers station with 6 feet of separation between players.

The biggest change this season to promote social distancing is that we will not be setting up the traditional team photo where the players are in close contact with each other. Instead, we will make a composite team photo from all of the individual pictures that are taken.

Each player and each coach will have their individual picture taken whether they are ordering pictures or not. Once the individual picture is taken, that person is free to leave. This will keep their time on site to a minimum. There should be no contact with any other players or with the photo staff.

All photo shoots will be conducted outside this fall. No indoor locations.

We highly recommend and encourage that all players bring their own prop (soccer ball, baseball bat etc.) so there is no sharing with other players. Olson Photography has always supplied props in the past but we will not be doing that this fall to promote safety.

We are making a PDF of the order form available to the parents this fall. Please print the form out and complete it at home. This will avoid sharing pens on location.

Olson Photography employees will wear face masks.

Hand sanitizer will be available at all shoots.
