

Over the summer, you will see some exciting changes happening at AJAA fields! We are so excited to get started on this, but understand that there will be some unanticipated mess and construction that may interfere with our families as the spring season comes to an end.

AJAA will be installing recreational play stations for our families to enjoy throughout the facilities. Unfortunately, supplies and equipment will be scattered during the initial stages of the project. Safety is our first and foremost focus at AJAA. We must ask that all athletes, visitors, and families do not climb or go near any of the uninstalled equipment to prevent injury. We are working diligently to get this equipment installed for our families as soon as possible!

We have also partnered up with the Eagle Scouts, to build some wonderful beautification projects for our facilities.

Gravel and field improvement work will also be taking place over the summer as it is needed after the spring season.

We appreciate your patience as we continue through the construction this summer! We look forward to each of our families being able to enjoy these changes in the future! Please plan on an exciting kick off fall weekend opener with events, attractions, and treats for our families to kick off these improvements!

Thank you!
AJAA Staff
