### **Real Colorado EDGE Soccer Club and Children's Hospital Colorado Form Partnership**

Real Colorado EDGE Soccer Club has officially signed a partnership agreement with Children's Hospital Colorado, and we are pleased to share the details with you. Our goal is to provide the best programming, value, and care for our members, and the partnership with Children's Hospital Colorado was a perfect match.

Children's Colorado will provide an athletic trainer at Stenger Soccer Complex home games during the league season, at our hosted tournaments, at certain other events, as well as, be available in our club office one day per week for visits. This will greatly benefit our athletes by providing immediate evaluation of any injuries. The athletic trainer will be a part of the club and he/she will be able to develop relationships with coaches, players and parents that are important for the well-being of the athlete and make care more accessible.

Children's Colorado will also provide educational content for our members in all newsletters, over our social media properties as well as, during our coach and parent educational nights. This content will help our members stay well informed and on top of latest trends and treatments. We would strongly encourage you to check these out, and if you have any questions, we'll have the resource in house to answer them!

Further information on our partnership will follow, along with the introduction of our athletic trainer and other pertinent info. We hope you share in our great excitement for this partnership and the value that it will have for the club and our athletes!

Sincerely,  
Real Colorado EDGE Staff
