Covid-19 Re-opening plan

As we move forward with our recovery from the Covid-19 Pandemic we understand that simply jumping back to the status quo will not suffice. To that end NFMJFA has devised the following plans for re-opening implementing several additional safety and logistical protocols. We understand that we are now operating in a rapidly evolving health climate and we will continue to look for ways to improve and adapt the following action plan. Any such changes will be added to this action plan as additional addendums as they become available.

We will require that all participants, volunteers, administrators, and parents that enter the park/league facility to certify daily that that do not have any of the following symptoms: **Cough, Shortness of breath or difficulty breathing, Chills, Repeated shaking with chills, Muscle Pain, Headache, Sore throat, Loss of taste or smell, Diarrhea or Feeling Feverish** If these symptoms are present we will require that the affected party not attend NFMJFA activities for at least 14 days. Additionally, any person with a positive test for COVID-19 will require official medical clearance prior to be admitted back into activities.

The following steps will remain in effect until further notice for ALL levels of reopening

1. We will utilize Non-contact Infrared Thermometers to check the body temperatures of every coach, participant, and administrator as they enter the park. (any person whose temperature is outside of normal will not be permitted to enter the park for that day).
2. Once the temperature has been verified as normal each person noted above will be required to wash or sanitize their hands.
3. Parents and/or guardians will be required to stay onsite as any lighting delays will require participants to return to parent's vehicles for shelter.
4. We will encourage all spectators stay outside of the park and suggest that they maintain a safe social distance from others.
5. All shared equipment will be disinfected once per hour during practice hours AND immediately before and after each day's use.
6. Participants will be required to bring their own source of water; single use hydration vessels will be on-hand for those who do not remember to or can not bring their own from home.

Any person who refuses screening, answers yes to any of the above noted health questions or has a temperature of 100.4 or higher will be denied entry into the park during any league activity.
