Online High School Program Overview

Acellus Academy's high school program allows students to graduate with a diploma from an accredited online school. Each student has access to self-paced courses, engaging video lessons, and personalized instruction. Acellus Academy offers two different graduation pathways: standard and honors.

To meet Acellus Academy's graduation requirements, students can select from an expansive list of courses. In addition to core subjects, like math, language arts, and science, students can select electives that they find interesting, which allows them to experiment with subjects tailored to specific career fields.

Before selecting classes, high school students can create a high school education plan, which accounts for the student's unique interests and potential career options. Since there are numerous courses available to high school students, this provides direction and recommendations to help students achieve their goals.

Acellus Academy's online high school prepares students for success after graduation. Whether they choose to attend college or pursue a career, Acellus Academy graduates will be competitive with their peers.

Graduation Pathway

Standard Pathway

This pathway is recommended for students that plan to attend a community college, join the military, or enter the workforce after high school.
