GBL COVID-19 UPDATE

As a community and world, we are all experiencing an unprecedented event. As an organization we are still closely monitoring the current situation regarding the Coronavirus. We are following the mandates that have been put into place on by the State and local governments, as well as adhering to the recommendations coming from the Federal Government.

Currently our season remains suspended. We are hopeful that we can resume the season at some point soon. While we are still committed to resuming the 2020 GBL season we must continue to monitor the situation on a regular basis and consult with healthcare officials and local government leaders. Our first and foremost focus is the safety and health of all our athletes, families and officials.

Several options are currently being explored as it relates to the resumption of the 2020 spring season. One of the possibilities would be extending the season into June and July. At this time nobody knows how much longer this will affect our normal everyday lives, but we are diligently working to make sure that we are ready once we are able to resume the season.

All of us at GBL are anxiously anticipating getting back on the fields and enjoying the game we all love. However, for now we must all do our part to help curb the spread of this virus. Please stay safe and stay healthy. We will continue to keep you updated and hopefully sooner, rather than later, we will see you at the ball park!

Stay safe,
The Executive GBL Board of Directors
