

UCI GiGaTEC

May 19, 2017 7-9 PM
Merage School of Business
Campus Building #SB1

Girls' Gateway to Technology and Engineering Careers

Many in high school feel the pressure to succeed in today's ultra competitive world, but aren't sure what exactly is out there and how it aligns with their abilities and passions. *Soccer teaches what girls need to succeed: hard work, competitiveness, creativity, team work, communication and the ability to overcome setbacks and losses.*

The key question is: what direction do I want to pursue?

This program will expose girls to technology and engineering career opportunities in areas such as health, environment, social networking, smart manufacturing, computing, mobility, information technology and civil infrastructure.

Program Elements: (1) Meet and greet with technology and engineering employers, UCI students, and UCI researchers. (2) Panel of speakers.

Contact: Ernest Garrison, Program Coordinator for Access and Inclusion, Henry Samueli School of Engineering. garrison@uci.edu. 949 824 6569
