

WILLIAMSON COUNTY SOCCER ASSOCIATION

YOUTH OUTDOOR REGISTRATION: SPRING 2018

DEADLINE: JANUARY 15, 2018

Fees: Thru September 30, 2017: \$75.00
October 1, 2017 - January 15, 2018: \$100.00
After January 15, 2018: \$125.00

WCSA cannot guarantee placement of any player registering after the January 15, 2018 deadline.

Player Last Name _____ First Name _____

Address _____ City _____ State _____ Zip _____

Area or Subdivision _____ School Attending (Spring 2018) _____

Home Phone _____ Sex: M F Birthdate Mo ____ Day ____ Yr ____

Father's Name _____ Cell # _____ Mother's Name _____ Cell # _____

E-mail _____ Would you like to Coach? ____ Asst? ____

Years Played _____ **Are you registered with a travel soccer association for 2017/2018? Y N**

Did you play up an age division in the 2017 Fall Outdoor Season? Y N

WCSA MEDICAL WAIVER

I/We certify that the given information is correct and complete and will provide proof of age. I/We know of no medical or other reason why the player cannot participate in WCSA activities. As parent(s)/legal guardian(s) of this player, I/we give my/our consent for emergency medical and/or dental care in the event of any injury or illness while involved in a WCSA program, and accept responsibility for prompt payment of such care and services. Recognizing possibility of injury, damage, and death, I/we agree to assume the risks of participation in WCSA activities.

I/We release, discharge, hold harmless, and indemnify WCSA (and its officers and agents, affiliated organizations and sponsors, leagues, tournaments, and owners of fields, facilities, equipment, and vehicles utilized) from any cost and liability for any injury, damage, loss, expense (including attorney fees), lawsuit, or otherwise, from negligence or any cause, excepting only willful or wanton misconduct directed at this player. I/We also give permission for the free use of our and player's name and/or likeness in any advertisement, broadcast, telecast, or other transmission or account or promotion of WCSA programs.

Failure to complete this form truthfully may result in this registration being denied and forfeiture of registration fee.

WCSA POLICY WAIVER

WCSA places players on teams primarily by neighborhood and school, but these criteria are impacted by many factors, such as the location of coaches (who are volunteers) and the number of players signing up from any particular area. All special requests for placement must be approved by the VP of Play. **Requests for specific teams may not be honored.** WCSA reserves the right to combine age divisions where necessary.

PLAYERS REMAIN ON THE SAME TEAM FALL AND SPRING

(Late registrations are not guaranteed a place on ANY team)

Returning players from the Fall season will use the same uniform for the Spring season

PLAY UP REQUESTS MUST BE SUBMITTED WITH A PLAYER'S REGISTRATION EACH SOCCER YEAR.

NO JEWELRY OF ANY KIND MAY BE WORN DURING PLAY.

EARRINGS COVERED BY BANDAIDS ARE NOT ALLOWED.

Any request for a refund must be received in writing, prior to the start of the season (fax or email are acceptable).

A 10% processing fee is applied to all refunds. No refunds will be issued after the start of the season.

I HAVE READ AND WILL DISCUSS/HAVE DISCUSSED THE ATTACHED CONCUSSION INFORMATION WITH MY PLAYER.

I have read and accept WCSA's Policy Waiver: X _____ (Parent's Signature)

PARENTS' CODE OF CONDUCT

WCSA's mission is to promote the sport of soccer by providing an organized, safe, fun-filled environment to develop players on an individual and team level. As a parent, you have a special opportunity to help all our players learn good sportsmanship and self-discipline by your encouragement and good example. Please observe WCSA's Code of Conduct to keep soccer a positive experience for all players, coaches and league officials.

I will:

Be a good role model to my child by encouraging fair play and good sportsmanship, and helping the players to focus on the positive aspects of their performance, not the game result.

Provide only positive reinforcement and support to all players on both teams, applauding effort as well as success, and recognizing that mistakes are part of the learning process.

Treat all players (both teams), coaches, officials and spectators with respect before, during and after games, and encourage my child always to do likewise.

Remain outside the field of play and on the spectators' side of the field (not behind the goal line) unless specifically invited to assist the coach.

Refrain from instructing my child from the sideline so that the coach may do his job more effectively, and allow my child to make his/her own game decisions.

Avoid criticizing the referee's decisions.

Always refrain from using or tolerating offensive, insulting or abusive language or behavior.

I understand that if I do not follow this Code of Conduct, I may be asked to leave the field area and/or the complex.

I have read and accept WCSA's Parents' Code of Conduct:

Mother's Signature **X** _____ Father's Signature **X** _____

Staging a successful soccer season is truly a cooperative effort. WCSA is a non-profit, volunteer organization, and we are always in need of coaches, commissioners, referees and more. If you would like to be involved, please let us know!

Parent/Athlete Concussion Information Sheet

A concussion is a type of traumatic brain injury that changes the way the brain normally works. A concussion is caused by bump, blow, or jolt to the head or body that causes the head and brain to move rapidly back and forth. Even a “ding,” “getting your bell rung,” or what seems to be a mild bump or blow to the head can be serious.

WHAT ARE THE SIGNS AND SYMPTOMS OF CONCUSSION?

Signs and symptoms of concussion can show up right after the injury or may not appear or be noticed until days or weeks after the injury.

If an athlete reports **one or more** symptoms of concussion listed below after a bump, blow, or jolt to

Did You Know?

- Most concussions occur *without* loss of consciousness.
- Athletes who have, at any point in their lives, had a concussion have an increased risk for another concussion.
- Young children and teens are more likely to get a concussion and take longer to recover than adults.

the head or body, s/he should be kept out of play the day of the injury and until a health care professional, experienced in evaluating for concussion, says s/he is symptom-free and it’s OK to return to play.

SIGNS OBSERVED BY COACHING STAFF	SYMPTOMS REPORTED BY ATHLETES
Appears dazed or stunned	Headache or “pressure” in head
Is confused about assignment or position	Nausea or vomiting
Forgets an instruction	Balance problems or dizziness
Is unsure of game, score, or opponent	Double or blurry vision
Moves clumsily	Sensitivity to light
Answers questions slowly	Sensitivity to noise
Loses consciousness (<i>even briefly</i>)	Feeling sluggish, hazy, foggy, or groggy
Shows mood, behavior, or personality changes	Concentration or memory problems
Can’t recall events <i>prior</i> to hit or fall	Confusion
Can’t recall events <i>after</i> hit or fall	Just not “feeling right” or “feeling down”

CONCUSSION DANGER SIGNS

In rare cases, a dangerous blood clot may form on the brain in a person with a concussion and crowd the brain against the skull. An athlete should receive immediate medical attention if after a bump, blow, or jolt to the head or body s/he exhibits any of the following danger signs:

- One pupil larger than the other
- Is drowsy or cannot be awakened
- A headache that not only does not diminish, but gets worse
- Weakness, numbness, or decreased coordination
- Repeated vomiting or nausea
- Slurred speech
- Convulsions or seizures
- Cannot recognize people or places
- Becomes increasingly confused, restless, or agitated
- Has unusual behavior
- Loses consciousness (*even a brief loss of consciousness should be taken seriously*)

WHY SHOULD AN ATHLETE REPORT THEIR SYMPTOMS?

If an athlete has a concussion, his/her brain needs time to heal. While an athlete's brain is still healing, s/he is much more likely to have another concussion. Repeat concussions can increase the time it takes to recover. In rare cases, repeat concussions in young athletes can result in brain swelling or permanent damage to their brain. *They can even be fatal.*

Remember

Concussions affect people differently. While most athletes with a concussion recover quickly and fully, some will have symptoms that last for days, or even weeks. A more serious concussion can last for months or longer.

WHAT SHOULD YOU DO IF YOU THINK YOUR ATHLETE HAS A CONCUSSION?

If you suspect that an athlete has a concussion, remove the athlete from play and seek medical attention. Do not try to judge the severity of the injury yourself. Keep the athlete out of play the day of the injury and until a health care professional, experienced in evaluating for concussion, says s/he is symptom-free and it's OK to return to play.

Rest is key to helping an athlete recover from a concussion. Exercising or activities that involve a lot of concentration, such as studying, working on the computer, or playing video games, may cause concussion symptoms to reappear or get worse. After a concussion, returning to sports and school is a gradual process that should be carefully managed and monitored by a health care professional.

It's better to miss one game than the whole season. For more information on concussions, visit: www.cdc.gov/Concussion.

Cardiac Arrest Acknowledgement Form **(Athlete/Parent/Guardian)**

What is sudden cardiac arrest?

Sudden cardiac arrest (SCA) is when the heart stops beating, suddenly and unexpectedly. When this happens, blood stops flowing to the brain and other vital organs. SCA doesn't just happen to adults; it takes the lives of students, too. However, the causes of sudden cardiac arrest in students and adults can be different. A youth athlete's SCA will likely result from an inherited condition, while an adult's SCA may be caused by either inherited or lifestyle issues.

SCA is **NOT** a heart attack. A heart attack may cause SCA, but they are not the same. A heart attack is caused by a blockage that stops the flow of blood to the heart. SCA is a malfunction in the heart's electrical system, causing the heart to suddenly stop beating.

How common is sudden cardiac arrest in the United States?

SCA is the #1 cause of death for adults in this country. There are about 300,000 cardiac arrests outside hospitals each year. About 2,000 patients under 25 die of SCA each year. It is the #1 cause of death for student athletes.

Are there warning signs?

Although SCA happens unexpectedly, some people may have signs or symptoms, such as:

- fainting or seizures during exercise;
- unexplained shortness of breath;
- dizziness;
- extreme fatigue;
- chest pains; or
- racing heart.

These symptoms can be unclear in athletes, since people often confuse these warning signs with physical exhaustion. SCA can be prevented if the underlying causes can be diagnosed and treated.

What are the risks of practicing or playing after experiencing these symptoms?

There are risks associated with continuing to practice or play after experiencing these symptoms. When the heart stops, so does the blood that flows to the brain and other vital organs. Death or permanent brain damage can occur in just a few minutes. Most people who experience SCA die from it.

Public Chapter 325 – the Sudden Cardiac Arrest Prevention Act

The act is intended to keep youth athletes safe while practicing or playing. The requirements of the act are:

- ***All youth athletes and their parents or guardians must read and sign this form. It must be returned to the recreational or competitive club/association before participation in any athletic activity. A new form must be signed and returned each recreational or competitive soccer year (August 1- July 31).***

Adapted from PA Department of Health: Sudden Cardiac Arrest Symptoms and Warning Signs Information Sheet and Acknowledgement of Receipt and Review Form. 7/2013

- The immediate removal of any youth athlete who passes out or faints while participating in an athletic activity, or who exhibits any of the following symptoms:
 - (i) Unexplained shortness of breath;
 - (ii) Chest pains;
 - (iii) Dizziness
 - (iv) Racing heart rate; or
 - (v) Extreme fatigue; and

- Establish as policy that a youth athlete who has been removed from play shall not return to the practice or competition during which the youth athlete experienced symptoms consistent with sudden cardiac arrest
- Before returning to practice or play in an athletic activity, the athlete must be evaluated by a Tennessee licensed medical doctor or an osteopathic physician. Clearance to full or graduated return to practice or play must be in writing.

I have reviewed and understand the symptoms and warning signs of SCA.
