- Click on “Select a file from your computer”

- The uploader tool is new this year and very much improved from last year

- Center the Blue template over the player's face and bring in the edges to frame the player's face only
- If the rectangle will not get small enough, it means your player is not a big enough part of the photo and you will need to use a different one
- Once the rectangle is set, click "Crop & Save"

CONGRATULATIONS!!!

- The new photo will be saved to the system and you are all done!
